# Cutting the Cording Ends - Step 25

After pulling your cording from BOTH ends of Edging to gather it in place along the top edge of your Bag Front, place a mark (<u>even with fabric edge</u>) on both cord ends...

then pull cord out of Edging just enough to place scotch tape around cord & over this mark.

(Yes I know this picture doesn't show the tape, but I figure you know how to do that without a picture, right? :)

Once that's done, sever cord thru tape along this mark (w/scissors) on both sides of bag.

Now push both cord ends back inside their respective Edging end. And whip-stitch these openings closed.
