

Festival Pocket Belt- Attaching Inner Pocket - Steps 26-28

Flip top Panel area DOWN over zipper & RST with bottom curved Panel area, exposing the upper interfaced edge of Zipper Facing underneath. Place Zipper Facing RST w/Inner Pocket (#9) aligning single notches. Stitch close to folded over Panel edge (see arrow) thru ALL layers including the cut Zipper Facing edge (from step 23). *It helps to use a zipper foot in order to NOT catch the Panel 2 fabric in this stitching.*

Here's a closeup of the area that I thought might be helpful.

Flip bottom curved area of Panel UP & over zipper so it's RST with top section of Panel & exposing lower edge of Zipper Facing underneath. Pin Zipper Facing edge RST w/remaining Inner Pocket edge aligning single notches. Stitch as close to folded over Panel edge thru ALL layers including the cut Zipper Facing edge (from step 23), then press Inner Pocket DOWN toward bottom of Panel. Once again, **DO NOT** catch Panel 2 fabric in this stitching.

Again, here's how this area looks after being stitched.

First trim Zipper Facing edges even w/Inner Pocket edges

Fold side edges of Panel over zipper exposing the the Zipper Facing edges underneath.

then stitch ~1/4" from edges thru ALL layers. Repeat procedure on right side of Inner Pocket, then set Panel 2 aside for step 28
