

## Festival Pocket Belt- Attaching Side-Release Buckle - Steps 36-37

Push the shorter of your two webbing ends (which extends from small pocket side of Panel 1) into & thru the “female-side of buckle.

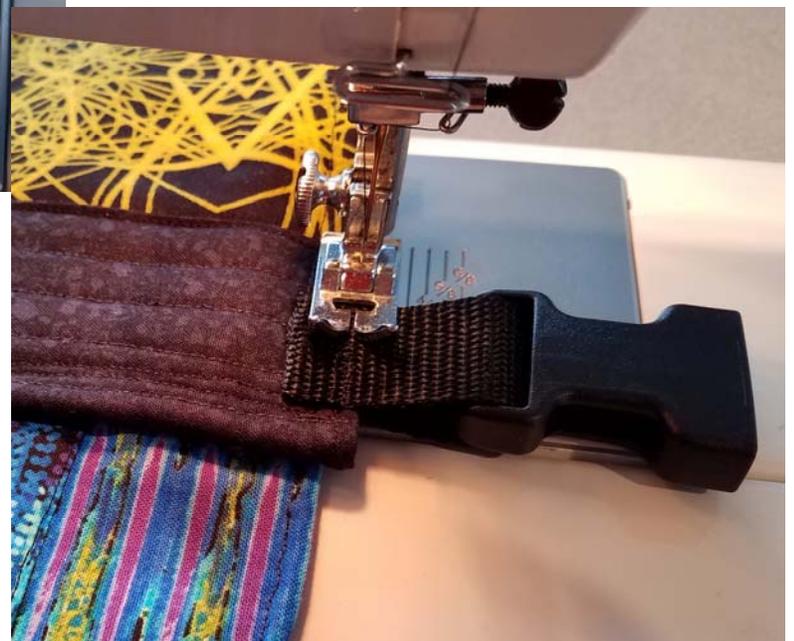

Flip Panel 1 LSU then pin ~1/2” of webbing end to backside of Panel.

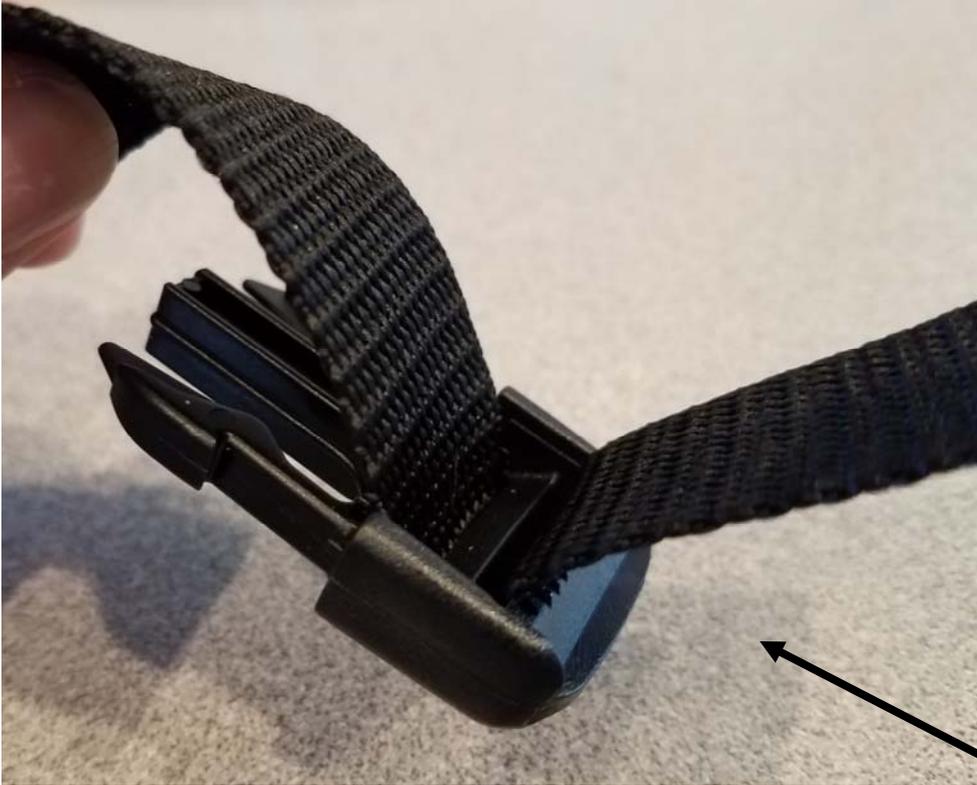

Stitch in place across webbing close to enclosed buckle, and also.....

across webbing and thru Panel ~1/8” from side edge. Reinforce BOTH stitching lines.

*Be sure to flip Small Pocket flap up & pull loose fabric of Small Pocket away from stitching area to avoid stitching into either*

Push webbing end thru Zipper Pocket unit & then into & thru "male-side" of buckle. The webbing should "lock" in place when you tug on this portion of the buckle.

Here's two pictures that may help you accomplish this.
