Wrapsody step 7-10– Appying bias tape to curvy Wall edge

Clockwise beginning with photo at left

1st— with ruler placed alongside upper & lower Wall notches, draw a line on the <u>lining side</u> of Wall. I use chalk but whatever you use, it's NOT going to show when your bag is finished.

2nd— s-t-r-e-t-c-h your bias tape as you pin it in place to get a smooth ripple-free finish (see my video referenced in the instructions and as you can see, I use LOTS of pins and this also HELPS!)

3rd— with that done we can flip the biqas tape over the raw edges and stitch them into place. :)
